Usage Guidelines

Placement: Place containers in areas that achieve desired supplement intake. Once acceptable levels have been achieved, the container may be moved to underutilized pasture areas to improve grazing distribution and forage utilization.

Relocation: Once acceptable levels have been achieved, the container may be moved to underutilized pasture areas to improve grazing distribution and forage utilization.

Accessibility: A minimum of two (2) containers may be necessary in each lot or pasture to ensure proper accessibility.

Quantity: Feed at the rate of one container for every 20-30 head. Cattle typically consume between 0.5 and 1.1 pounds per head per day.

Monitoring: Self-fed consumption will depend on size of the animals fed, seasonal weather conditions, as well as quality, source and availability of other feeds.
