# Blueprint® Fescue Mag FEB-200™

Product #61495

## Feeding Applications

For Beef Cattle on Pasture.

## Product Features

CRYSTALYX Blueprint Fescue Mag FEB-200 contains 20% crude protein from vegetable based ingredients, as well as non protein nitrogen (NPN). It is formulated to be self fed to cattle consuming fescue forages with low magnesium levels to help improve forage utilization. Blueprint Fescue Mag FEB-200 also contains FEB-200 to help support overall performance and help cattle attain maximum genetic potential on fescue forages. Blueprint Fescue Mag FEB-200 is uniquely fortified with all highly bioavailable organic trace minerals and contains no inorganic trace mineral forms. [The Blueprint product line](#) is intended to provide optimal trace mineral nutrition to meet today's advanced animal genetic demands while protecting the environment from unnecessary over supply of less available forms.

## Usage Guidelines

**Placement:** Place containers in areas that achieve desired supplement intake.

**Relocation:** Once acceptable intake levels have been achieved, the containers may be moved to underutilized pasture areas to improve grazing distribution and forage utilization.

**Accessibility:** A minimum of two (2) containers may be necessary in each lot or pasture to ensure proper accessibility.

**Quantity:** Feed at the rate of one container for every 20-30 head. Cattle typically consume between 0.3 and 0.75 pounds per head per day.

**Monitoring:** Self-fed consumption will depend on size of the animals fed, seasonal weather conditions, as well as quality, source and availability of other feeds.
