## Usage Guidelines

**Placement:** Place containers in areas that achieve desired supplement intake. Once acceptable intake levels have been achieved, the containers may be moved to underutilized pasture areas to improve grazing distribution and forage utilization. Place containers in dry spots near loafing areas and watering locations.

**Relocation:** Once acceptable intake levels have been achieved, the containers may be moved to underutilized pasture areas.

**Accessibility:** A minimum of two (2) containers may be necessary in each lot or pasture to ensure proper accessibility.

**Quantity:** Feed at the rate of one container for every 10-20 head. Goats typically consume between 1 and 4 ounces per head per day.

**Monitoring:** Self-fed consumption will depend on size of the animals fed, seasonal weather conditions, as well as quality, source and availability of other feeds.
